PPMI Merge

2022-05-04

Here, we utilize PPMI subject clinical data files (PPMI Study Data) to create a single .csv file that contains longitudinal clinical information of PPMI subjects (included in Analytic Cohort).

Getting the data

1.) Get access to PPMI database and login.
2.) Click download from the navigation bar and select study data.
3.) Select ALL documents and zip files and click download.
4.) Unzip and save the folder on your computer.

Import required modules

```python
import pandas as pd
import numpy as np
import boto3
from datetime import datetime
from dateutil import relativedelta

userdir = '/Users/areardon/Desktop/ppmi_merge/'
ppmi_download_path = userdir + 'PPMI_Study_Data_Download/'
invicro_data_path = userdir
genetics_path = userdir + 'genetic_data/'
version = '0.0.3' # File version to save as i.e. ppmi_merge_v0.1.csv
